

Winches & Rigging – General Setup

Single Line Pull

Double Line Pull

Rigging Components

- Winch Hook – used to connect winch line to other rigging components
- Winch Strap (Tree Saver) – used to wrap around anchor point
- Soft Shackle – used to connect rigging components together
- Pulley Block – used to gain mechanical advantage in certain setups
- Winch Blankets – laid on winch cables & ropes to dampen whipping effect in the event of rigging failure under load

Safety

- Be sure to read your winch manual before use and follow the General Safety Warnings & Cautions
